

Executive Biographies

Rick Baily is Vice President & General Manager, C3 Networks (Command, Control, and Communications) -- part of the Network and Space Systems (NSS) organization in Boeing's Integrated Defense Systems (IDS) business unit -- and the Anaheim, Calif., and Huntington Beach, Calif., site executive host.

Baily is directly responsible for leading C3 Networks' varied activities in its addressed markets of Command and Control (IC2), Network and Information Systems (N&IS), Intercontinental Ballistic Missile Systems (ICBM), Integrated Shipboard Systems (ISS), and the Network Enabled Systems division of Boeing Australia Limited (BAL). In addition to the Anaheim and Australia facilities, he has responsibility for divisions within the C3 Networks organization located in Ogden (UT), El Paso (TX), and Heath (OH).

Prior to this assignment, Baily was Vice President, Battle Command Systems (BCS) and led program execution for all Army Systems BCS-related programs including communications, command and control, and tactical intelligence systems. Prior to joining Army Systems, Baily was Deputy General Manager for Integrated Defense Advanced Systems (IDeAS) and concurrently led the Network Centric Operations Programs & Technologies organization within IDeAS; and prior to that, was Deputy Program Manager of the Future Combat Systems program during the Concept Technology and Demonstration (CTD) phase that culminated in a successful Milestone B Review.

Baily has also had a variety of program management and engineering assignments in systems product development, including leading the RS-68 Engine integrated product team for the Boeing Delta IV program. He also led the Rocketdyne Operations organization, which included Manufacturing, Facilities & Plant Operations, and Materiel. Project engineering assignments have included developing space power systems, missile defense technologies, and booster and upper stage liquid rocket engines.

Baily has a Master of Science and Bachelor of Science degree in Mechanical Engineering from UCLA and the University of Colorado, respectively.
