ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

Wayne Bonser

Wayne Bonser

Director of Collaboration and Transition-Engineering,
Networking Technology, Air Force Research Laboratories
United States Air Force

Wayne Bonser is director of Collaboration and Transition-Engineering, Networking Technology, Air Force Research Laboratories (AFRL), United States Air Force.

Bonser has been at the Air Force Research Lab, in Rome N.Y., for 35 years and is currently a principal engineer and AFRL fellow where he directs the Grid Division's technology transition and collaboration opportunities for Cognitive and Airborne Networking.

As AFRL's point of contact for airborne networking he is responsible for coordinating and advocating the yearly research and development roadmap for investment planning.

He communicates AFRL technology programs and concerns at two- and three-star levels across the services and Department of Defense (DoD), and represents AFRL on the WNI-06-Core-Team.

Bonser originated and hosts the annual Airborne Networking Technology Review Days Symposium, where the government presents its visions, concepts, technologies and challenges to industry and academia.

Bonser is a Certified Acquisition Professional, Level III, 1994.
