ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

Dr. Richard DeSalvo

Dr. Richard DeSalvo

Principal Investigator and Manager of Technology Studies and Research and Development (R&D) Projects

Harris Corporation's Government Communications Systems Division

Dr. Richard DeSalvo is a principal investigator and manager of technology studies and R&D projects for Harris Corporation's Government Communications Systems Division where he coordinates division research and development activities supporting multi-divisional and multi-disciplinary technical initiatives for DARPA and other U.S. Government research laboratories.

His technical areas include optics and photonics for high-speed lightwave communication systems, RF photonic sub-system insertion, Dynamic Spectrum Access for Tactical Battlefield Network, next generation wireless networks for future military systems.

DeSalvo received his doctorate in physics from the University of Central Florida CREOL in 1993, and his bachelor's degree in physics from Jacksonville University in 1987.
