

MILCOM:08

ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

Jay Hicks

Jay Hicks

Chief of Technical Management
PM DCATS, U.S. Army

As Chief of Technical Management for Project Manager, Defense Communications and Army Transmission Systems (PM DCATS) since 2000, Hicks is the focal point for providing R & D, technology insertion and systems engineering for PM DCATS projects. Hicks has worked at PM DCATS and various predecessor organizations since 1989.

He initially joined Project Manager, Satellite Communications (PM SATCOM) as deputy program manager, Universal Modem System. Later, he served as assistant program manager, DSCS Control for PM MILSATCOM.

Hicks entered Civil Service with the CECOM Engineering Directorate and later moved to the Project Manager Multi-Service Communication Systems (PM MSCS), where he served as Project Leader/Systems Engineer on various TRI-TAC systems.

Hicks graduated with a BS/ME from the New Jersey Institute of Technology in 1980. In 1987, he received his master's degree in business administration from Rutgers University.
