ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

## Dr. Jack Hollister

### Jack Hollister

Ball Aerospace

Dr. Jack Hollister joined Ball Aerospace in early 2007 after having spent the previous 25 years with McDonnell Douglas and then Boeing. Dr. Hollister was a senior system engineer on the Transformational Satellite (TSAT) Laser Communications program. He also led the laser threat analysis and mitigation effort for TSAT. Dr. Hollister was also the chief scientist for the Laser Communications Technology Demonstrator program at Boeing. He managed the Multi-Access Wide Field-of-View Enhancement Activity (MAWFEA) laser communications program.

Dr. Hollister has authored several studies for next-generation laser communications systems. He has been awarded six patents in laser and electro-optic technologies.

Dr. Hollister received his doctorate in experimental atomic physics from the University of Washington in 1982.
