

MILCOM:08

ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

Robert Masucci

Robert Masucci

Staff Engineer, Systems Engineering
Thales Communications

Robert Masucci is currently a staff engineer in systems engineering at Thales Communications. He is responsible for several programs at Thales that involve developing new waveforms for the AN/PRC-148 Joint Tactical Radio Systems (JTRS) Enhanced MBITR (JEM) as well as advanced technology development.

Prior to this, Masucci was the director of systems engineering at Cognio Inc., a privately held start-up that was acquired by Cisco in 2007, which focused on creating integrated circuits and software for spectrum management and MIMO radios.

Masucci has a master's degree in electrical engineering from George Washington University and holds three U.S. patents in wireless technologies.
