ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

Keith Olds

Keith Olds

Chief Systems Architect for Battlespace Networking
Harris Corporation

Keith Olds is the chief systems architect for Battlespace Networking at Harris Government Communications Systems Division. Since joining Harris in 2003, he has worked in tactical networking including the WIN-T and FCS programs; has led the definition of the highband-networking-waveform; and helped develop directional MANET systems like the Harris Highband-Networking-Radio. He is currently engaged in extending directional MANET onto air and seaborne systems.

Prior to joining Harris, Olds worked for 27 years at Motorola, where he was the lead communications architect for the Iridium Personal Satellite system. He holds 55 patents in communications, networking and radar systems.
