ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

## Bob Scott

### Bob Scott

Senior Fellow

Raytheon Network Centric Systems

Bob Scott is a senior fellow for Raytheon Network Centric Systems in Largo, Fla.

Scott specializes in secure networking and wireless communications, with a focus on commercial networks. He is currently the technical director for a large, secure IT system for a Raytheon international customer.

Scott has been at Raytheon for six years. Previously he was at AT&T Paradyne for more than 20 years, where his various roles included director of engineering for Wireless Data.

Scott is an inventor with 28 patents, covering a wide range of communications disciplines — security, wireless, broadband networking, etc. One of his security-related patents — U.S. Patent #5,311,596

Continuous Authentication Security — was the 1994 winner of the prestigious AT&T Patent Recognition Award.

Scott has numerous Cisco networking certifications, is a FEAC-certified enterprise architect and has more than 20 years experience working on various communications standards bodies.
