

**Bryan M. Scurry**  
**Director of Operations/Technical Director**  
**Program Executive Office, Space Systems**

Mr. Bryan M. Scurry was commissioned as a Naval Officer in 1984 and designated as a Naval Aviator in 1986. From 1987 to 1990 he completed his first sea tour with Attack Squadron (VA-185) flying the A6E Intruder off the USS Midway (CV 41). From 1990 to 1995 he was assigned to the Naval Air Warfare Center, Weapons Division (NAWC WPNS) China Lake as the project pilot for the Advanced Projects Office where he oversaw development, integration, and initial test of advanced technology. During this timeframe he also supported the A6 Weapons System Support Activity (WSSA) with the A6 operational developmental flight test and associated weapons systems. In January 1995, Mr. Scurry entered the Civil Service as the Head of the Weapons Systems Planning Office, overseeing the initial concept definition of Navy air-to-ground weapons systems including the Joint Stand Off Weapon (JSOW), Joint Direct Attack Munitions (JDAM), Standoff Land Attack Missile (SLAM), and the Joint Air to Surface Standoff Missile (JASSM). In 1996, he joined the Naval Command and Control Systems program office within Space and Naval Warfare Systems Command (SPAWAR) in San Diego as Systems Engineering, Installation Director, Test Director, and Assistant Program Manager for Tactical and Mobile Command and Control Systems. He recently completed a tour as the Deputy Program Manager for Command and Control (PMW-150) which included the Global Command and Control System – Maritime (GCCS-M), Naval Tactical Command Support System (NTCSS), the Joint Warning and Reporting Network (JWARN), and Tactical data Links (TADILs) in the Program Executive Office (C4I & Space). In February 2005, Mr. Scurry was assigned to the Program Executive Office for Space Systems (PEO SS) responsible for the acquisition of narrowband satellite communications (SATCOM) capability as the Director of Operations and the Technical Director. Mr. Scurry also served a short tour as acting Deputy for the PEO and Executive Director for SPAWAR Space Field Activity which supports the National Security Space community. He currently oversees execution of the Mobile User Objective System (MUOS) and represents the U.S. Navy on technical and programmatic issues regarding space acquisition. Mr. Scurry graduated with Special Honors from the University of Colorado with a Bachelor of Science Degree in Aerospace Engineering and from California State University, Northridge with a Master of Science Degree in Mechanical Engineering. Mr. Scurry is also a Captain in the United States Naval Reserve.
