ASSURING MISSION SUCCESS

November 17–19 San Diego Convention Center

Larry Wentz

Larry Wentz

Senior Research Fellow, National Defense University
Center for Technology and National Security Policy

Larry Wentz is a senior research fellow at the National Defense University, Center for Technology and National Security Policy. He is an experienced manager, strategic planner, C4ISR systems engineer, author and lecturer. In 2006, he visited Afghanistan to research Afghanistan Telecom and IT reconstruction. While on special assignments to ASD (C3I) Command and Control Research Program (CCRP) he visited Bosnia and Kosovo to research and authored two NDU/CCRP published books: *Lessons from Bosnia: The IFOR Experience* and *Lessons from Kosovo: The KFOR Experience*.

Wentz was a research scientist at the George Mason University Center of Excellence in C3I, a vice president of Advanced Communication Systems-Washington Operations and Technical Director at the MITRE Corporation.

Wentz received a bachelor's degree in electrical engineering from Monmouth College and a master's degree in systems engineering and operations research from the University of Pennsylvania. He completed the Executive Management Program at the University of Pennsylvania's Wharton Business School and the Harvard John F. Kennedy School of Government Program for Senior Executives in national and international security.
