

MILCOM 2008 Technical Program Tracks—Unclassified

The MILCOM 2008 technical program promises to be one of the best in MILCOM's 27 year history. Conference attendees will benefit from technical presentations by the world's foremost military and government communications systems experts. The Technical Program Tracks shown below represent the broad topics which will be covered at MILCOM 2008. Each Technical Program Track is composed of multiple paper sessions that take an in-depth look at the communications, information technologies, and capabilities that address 21st Century communications challenges.

Technical Program Tracks

Advanced Communications Technologies	ACT
Architecture, Modeling, and Simulation	AMS
Information Assurance and Security	IAS
Modulation, Coding, and Signal Processing	MCS
Network Centric Systems	NCS
Network Protocols and Management	NPM
Radio Systems and Technologies	RST
SATCOM and Space Airborne Communications	SAC
Wireless Mobile Communications	WMC
Wireless and Sensor Networks	WSN

We salute and thank the industry, academic, and government technical experts from both the US and countries around the globe who are sharing their expertise at MILCOM 2008.
